

Hello, did you know that about 92% of piranhas eat plants. Yeah, I know, weird. The word weird is odd too because "i" goes before "e" except after "c" but the word weird has the letter "e" before the "i" and there isn't any "c" in the word weird. If there was the letter "c" in the word weird it would be like wcierd and that's weird. But what's really weird is that the doctors and scientists don't find a cure for the common cold because the common cold really sucks. Your nose get all plugged and your throat hurts and it makes you want to stop breathing but that's a big no no 'cause then you would die.
