

# The Smiling Potato

## Businessplan

A Preschool or day care system for 2-6 year olds. Where we going to teach the children german. The whole set up is going to be in German and we are only talking to the children german, as soon they have the basics done.

This will work because I speak german and I know that a lot of people want their children to start with a language early. I actually got asked if I would do a baby-sitting job to talk german to the children, but I had to deny because that would have been illegal.

Even though I know some people who would want that in Lynden, I would open the preschool in Seattle, because parents spent more money on day care there.

With the 5.000 dollar I would need to rent a room, maybe I can cancel the room cost later by going to a neighborhood community and move around in the peoples houses.

I also would get some children's book either that I already used when I was growing up or new ones. They are going to be my favorites. Also I can research for free German children rhythms in the internet. Some children CD's from Germany would be good, too. I think I even have some at home.

Some of the money is used for decoration, about 100 to 200 dollar. For each child I would get 10 dollar an hour. Alone I can take 5 children a 60 dollar a day makes 300 dollar, then I even can afford a help, of course fluently in German. And we can have 10 children, maybe 15 children a day. That would make 600 to 900 dollar a day!

From that I'll need to get some snacks, so 100 dollar less.

I would have my money back in less than a month.
